You ARE the Partnership
- input
- participation

4 Important words for data sharing:

Authority

Discovery

Access

Interoperability

Reality Check

How much we can do will depend upon the resources that are available

Those resources are uncertain:

Regional Association

GoMOOS – leverage of related activities

Partner involvement

Interoperability Demonstration Projects

Develop capability that

- truly helps a Partner do their job better

and/or

- has application for a wide range of needs

Able to be completed in 3-6 months

Breakout sessions to help identify the projects:

- data sets for access

- interoperable capabilities

Approach

- **Draft Work Plan document is the starting point**
- **Add/subtract/modify through discussion**
- **Get consensus/approval for the Plan – the core elements**
- **Document to be revised and circulated for final word-smith'ing**

So.....
