Data Discovery and Download (mockup)

The mockup displays a satellite map of the Northeastern United States coastline. Numerous red and purple circular markers are plotted along the coast, representing data collection points. To the right of the map is a metadata panel for a selected location. The metadata includes:

- Organization:** NERACCOOS
- Name:** Northeastern Regional Association of Coastal Ocean Observing System (NERACCOOS) moored buoy program
- Monitoring Location:** M01
- Name:** Jordan Basin
- Location:** 43.4818,-67.9

 Below the metadata is a legend titled 'Legend' with a 'Deselect all' button. The legend lists several organizations with checkboxes:

- NEW HAMPSHIRE DEPARTMENT OF ENVIRONMENTAL SERVICES
- Fisheries and Oceans Canada
- Northeast Fisheries Science Center
- Gulfwatch Program
- Northeastern Regional Association of Coastal Ocean Observing System (NERACCOOS) moored buoy program
- Seanel Ecological Assessment Network

 The map interface includes standard Google Maps controls like zoom, pan, and map style selection (Satellite, Hybrid, Terrain). A scale bar at the bottom left shows 100 miles and 200 kilometers.
